FIG. 5

FIG. 6

FIG. 7 is a perspective view of the device 100 showing the device 100 in a closed position. The device 100 includes a housing 10, a lid 20, and a plurality of layers 30. The housing 10 and lid 20 are formed of a material that is transparent to the light 40. The layers 30 are formed of a material that is opaque to the light 40. The layers 30 are stacked on top of each other and are held together by the housing 10 and lid 20. The device 100 is shown in a closed position, with the lid 20 covering the layers 30. The light 40 is shown entering the device 100 from the left side. The light 40 is shown passing through the housing 10 and lid 20, and is reflected by the layers 30. The light 40 is shown exiting the device 100 from the right side.
